

Figure 3. Blast Atlas analysis for 10 *Cylindrospermopsis raciborskii* strains from the Americas, 11 *Cylindrospermopsis raciborskii* strains Non Americas, and 6 *Sphaerospermopsis* strains. Identification of the saxitoxin (*sxt*), cylindrospermopsin (*cyr*), hassalidin (*has*), anabaenopeptin (*apt*), nocuolin (*noc*) and sphaerocyclamide (*sph*) gene clusters. These clusters are highlighted inside the boxes, and their locations in the genomes are indicated in the figure.
